

Firm Profile

VHB employs over 900 planners, designers, engineers, and environmental scientists in 22 offices along the East Coast. Since 1979, VHB has partnered with public- and private-sector clients to provide the best technical skills in each practice area through a seamless, integrated team approach to collaboration. Premier industry publication *Engineering News-Record* ranks the firm #76 of the Top 500 Design Firms nationwide, and VHB is a frequent recipient of project awards for planning, engineering, and environmental excellence. VHB offers a wide range of technical services and capabilities:

- Land planning and site design
- Community and regional planning
- Environmental review, permitting and restoration
- Transportation planning, engineering and design
- Civil engineering and land surveying
- Bridge design and inspection
- Sustainability and climate action planning
- Landscape architecture and design
- Community and stakeholder outreach
- Real estate advisory services

VHB has diversified technical, management, economic, and social issue experience that is applied with vigor and responsiveness to meet client goals. A proven record of providing resources and services in a timely and cost-effective manner underscores a commitment to the expeditious completion of project tasks through collaboration with clients and VHB colleagues nationwide. The ability to help our clients initiate and complete intricate, challenging, and important projects has given rise to an impressive portfolio of success throughout New York State, and the seamless integration of VHB's planners, engineers, and environmental scientists is proven to serve our clients well.

A charter member of the Institute for Sustainable Infrastructure, VHB is a leader and innovator in the sustainable planning and design of environmental, transportation, and infrastructure systems. We offer the planning and permitting experience to guide developers and municipalities in identifying and executing practical planning strategies necessary for environmentally sensitive and responsive development. VHB has been involved with both the New York State Climate Smart Communities Program and New York State Cleaner, Greener Communities Regional Sustainability Planning Program.
